Introduction

Would you like to get a canton's most important statistical facts at a glance? Would you like to compare your canton with other cantons or with Switzerland as a whole? As part of its comprehensive range of regional statistical data, every year the Federal Statistical Office makes available on its Swiss Statistics website new cantonal portraits with roughly 70 up-to-date key figures.

The key figures from the interactive online application are compiled in table format in the present publication for a better overview and for everyday use as a work of reference. Data come from the regional database platform Stat@tlas and in each case show the latest available figures on the reference day indicated (see box below).

The publication appears annually in German, French, Italian and English and is automatically generated from the database. For this reason its layout does not correspond exactly to the usual specifications for FSO publications.

Cantonal portraits 2016

Data as of:	22.7.2016
Number of portraits:	27
Topics:	15
Variables:	74
Regionalisation:	Cantons (1.1.1997)
Data source:	FSO
Database:	Stat@tlas

Online application cantonal portraits

The online application, which also includes a comparator as well as a print and search function for individual regional units, can be found at:

www.swiss-statistics.ch → **Regional Data** → **Cantons**

Data downloads and explanations

A data download is also available on the Swiss Statistics website (Format: Excel) as well as metadata with explanations for certain key figures:

www.swiss-statistics.ch → **Regional Data** → **Cantons** → **Data and explanations**

Further up-to-date information available online:

Portraits of Swiss communes

www.swiss-statistics.ch → **Regional Data** → **Communes**

Portraits of European countries

www.swiss-statistics.ch → **World Data** → **Country portraits**

The interactive *Statistical Atlas of Switzerland* also visualises the same key figures and numerous other official statistics topics in the form of thematic maps and provides time series for most topics. Access to atlas:

www.statatlas-switzerland.admin.ch

Legend to symbols

- no results available as data not collected

Explanations of data from the Structural Survey

A number of data in these portraits come from the Structural Survey which forms part of the new population census. The **following key figures** belong to this category:

- Main language
- Religious affiliation
- Employment
- Net activity rate
- Homeownership rate
- Main mode of transport of employed persons
- Education level

The Structural Survey is a random sample survey of 200,000 persons. As random sample surveys are comprised of only a fraction of the population of interest, their findings are always marked by a degree of uncertainty. This uncertainty depends on the size of the sample, the sampling rate, the non-response rate and the distribution of the observed variables in the statistical population. It can be quantified by calculating a confidence interval which grows wider as the results become more imprecise. Such quantification presupposes that the sample has been randomly selected from the statistical population. This is always the case for the Federal Statistical Office's random sample surveys.

Further information on the "confidence interval" can be found in the online glossary (in French, German and Italian): www.swiss-statistics.ch → **Data Library** → **Definitions**

Due to the uncertainty of the results, no values are shown for cantons with fewer than 50 observations or a coefficient of variation greater than 10%. The confidence interval at 95% should not be more than $\pm 20\%$ in relation to the value measured. The population includes all persons in the permanent resident population aged 15 or older, except for residents of collective households, diplomats, international officials and their relatives. The reference day coincides with the register survey day (31 December). Further information can be obtained from our website:

Further information on the structural survey can be found online at: www.swiss-statistics.ch → **News** → **The new census** → **The four key elements of the new Federal population census** → **Structural survey**

Additional explanations of key figures

Population

Data source: Population and Households Statistics (STATPOP); Vital statistics (BEVNAT)

The population figures refer to the permanent resident population at year-end.

Residents: permanent resident population as of 31.12.2014

Population density per km²: Population measured in relation to the polygon area (excluding lakes > 5 km²; SWISSBOUNDARIES^{3D}©swisstopo).

Urban population in %: NEW according to FSO typology «Area with urban character 2012»

Main language in %

Data source: Structural Survey

As respondents were allowed to indicate several languages in the survey, the total may exceed 100%.

Religious affiliation in %

Data source: Structural Survey

Area

Data source: Land Use statistics 2004/09

Point areas; incl. special zones and lakes > 5 km².

Work and income

Net activity rate (15–64 years)

Data source: Structural Survey

Unemployment rate (according to SECO)

Data source: Employment Statistics of the State Secretariat for Economic Affairs (SECO)

The average number of registered unemployed persons in proportion to economically active persons pursuant to the Structural Survey 2010 (incl. international officials).

Economy

Gross domestic product per capita in Swiss francs: GDP at current prices

Change in %: GDP at previous year's prices
Data source: National Accounts (NA)

Employed and Business establishments

Data source: Statistics on Enterprise Structure STATENT; provisional figures

Agriculture

Data source: Farm Structure Census

Construction and housing

Dwelling vacancy rate

Data source: Empty Dwellings Survey

The dwelling vacancy rate is calculated based on the housing stock of the Buildings and Dwellings Statistics (BDS).

Homeownership rate

Data source: Structural Survey

Average per capita living space in m²

Data source: Buildings and Dwellings Statistic (BDS)

New housing units per 1000 residents

Data source: Annual Construction and Housing Statistics

Tourism

Data source: Statistics on Tourist Accommodation (HESTA)

Mobility and transport

Passenger cars per 1000 inhabitants

Data source: Road Motor Vehicle Statistics

The canton is determined by the address of the holder and not by the number plate.

Main mode of transport of employed persons in %

Data source: Structural Survey

Public transportation: railway, tram, metro line, trolley bus, bus, post bus, coach

Private motorised transport: moped, motorcycle, motor scooter, passenger car (as driver or passenger), company bus

Social Security

Social assistance rate

Data source: Social Assistance Statistics

The social assistance rate refers to the social assistance recipients who claimed benefits in the survey year as a percentage of the previous year's total permanent resident population (STATPOP).

Health

Physicians in private practice per 100,000 inhabitants

Data source: Health Statistics

Physicians whose main activity is in the outpatient sector according to the members statistics of the Swiss Medical Association.

Hospitals

Data source: Hospital Statistics/Medical Statistics of the Hospitals

Hospital beds per 1000 inhabitants: Average number of inpatient beds per year

Hospitalisation rate in intensive care (per 1000 inhabitants): Inpatient cases (discharges), by the canton of residence of the patients

Educational level in %

Data source: Structural Survey

The number refers to the percentage of persons with the corresponding educational level measured in relation to the reference population (here the population aged 25 or older from the Structural Survey).

The sum of the shares of the various educational levels does not always result in 100%. Persons whose educational level was unknown were not considered.

Without post-compulsory education: No educational programme completed, compulsory education

Upper secondary level: Vocational education, Matura school, other general education qualification (e.g. upper-secondary specialised school)

Tertiary level: Higher vocational education, university of applied sciences, higher education institutions, universities and institutes of technology

Graduation rate in higher education institutions

Data source: Swiss University Information System (SUIS)

Percentage of vote (National Council elections)

Data sources: National Council Elections Statistics

"—" = the party concerned did not stand for election in this canton.

FDP/PLR: Due to the merger of the FDP/PLR and LPS/PLS at the national level, the electoral strength on this level of the FDP/PLR includes the LP/PL-VD and the LP/PL-BS.

Small right-wing parties: REP/SD/EDU/FPS/Lega/MCR

Criminal offences as % of total population

Data source: Police Crime Statistics (PCS)
